38 Oops!

39 Class of 2022

From the editor...

It has truly been an honour to be your Pubs Executive Officer of 2022. With the power of my gen comm (comprising of Ella George and Dalena Ly) and my sub comm (Siyuan (Angel) Feng), Pubs has had roaring success this year. Thank you so much you guys, we wouldn't have achieved what we have this year without your hard work!

AI Dente has continued to grow this year with the debut of ILA episodes (2x this year), an Event episode, 3x Sponsorship episodes, and 2x dentist episodes, all of which contributed to Season 3 of AI Dente having 15 episodes! Currently across Spotify and Apple Podcasts we have 266 followers, the mean number of listeners per episode from 2021 to 2022 has increased by 41%! Our top fans across the globe in order being: Australia, Brazil, Singapore, Canada, and New Zealand (maybe one day we can do an international tour)

To the new BDS and BOH graduates, good luck to you guys, I am manifesting full books, lots of crowns and no letters from AHPRA for you guys. Ya'll are the last seniors us BDS4s had to look up to after our precious time with seniors were stolen by COVID. I can't wait to see where your bright future takes you guys and hopefully you guys will keep in touch if you can!

A massive thank you to our lovely 2022 AUDSS Patron, Dr Anna Murray, who was such a good sport when I started emailing her LAST YEAR about her AI Dente episode and Paperpoint. You were an amazing Patron and I'm glad no one had to use you to be bailed out of the Hindley St Police station.

Ella, you'll kill it as Pubs exec next year (you too Dalena as Marketing exec!), you're an absolute gun, I hope I taught you well and that you can add some of your own creative flair to Pubs, I can't wait to see what you produce!

Acknowledgement of country.

We would like to acknowledge and pay respects to the owners of the land we are privileged to publish The Articulating Paper on, the Kaurna people. The traditional custodians of the land, waterways and skies across Adelaide. We thank them for sharing and caring for the land on which we are able to share our experiences. We pay our respects to elders past, present, and emerging and we share our friendship and our kindness.

Be well, do good deeds and keep in touch,,

Jingyang Li

2022 AUDSS Publications Executive Officer

Patron's Report

2022 – the year that was...

You could have knocked me down with a feather when I was asked to be the patron of the AUDSS for 2022, and that is no word of a lie. “Who, me?” was my first thought, and my second, and third... and you get the picture.

It was an incredible honour to even be considered for the role. Having not gone through the Adelaide Dental School myself, I was, to be honest, a little unsure of what the role would entail. Was it purely in name only or would my mobile number be distributed to the student cohort so they could call me to bail them from Hindley St Police Station, if required? As this is an academic institution, I duly did my research (ie asked Dr Stow and Dr Lekkas). They reassured me that it would be great and I am pleased to say they were correct. Not that I ever doubted them.

2022 has thrown more curveballs to our students, especially those in the clinical years, than those of the previous years of the pandemic. The arrival of COVID-19 in our community has had a significant impact on patients, students, tutors and academic staff alike. But with grace and style, for the most part, we have ridden the rollercoaster and somehow here we are, staring down the barrel of finishing up courses of care, approaching exams (and holidays) and for the Class of '22, the beginning of the next adventures in dentistry.

The AUDSS has had another successful year in its illustrious history, under the steady leadership of Derek, Scarlett and the Committee. The charitable events that do so much to foster the sense of social responsibility amongst the student body, such as the Sleepout in support of the Community Outreach Dental Programme and Trivia for Timor, were as always, so well supported. For me, to see how much our students achieve in terms of embracing that sense of giving back is just outstanding. The way that you all support such really important endeavours gives me a huge amount of pride in what we represent as a School and as a profession.

Obviously, it can't be all work and no play, and with great excitement, 2022 will be remembered as the year that dancing returned! The Grand Dental Ball was a big date in the social calendar, and I'm pleased to say, I didn't hear a thing about Dent Camp, and no one needed rescuing from Hindley St, at least not to my knowledge. The AUDSS does a fantastic job of creating a cohesive student group across the years. The friends you make at Uni will be friends you have for life - my best mate from the University Dental School and Hospital, Cork is coordinating Rem Pros at the Peninsula Dental School in Cornwall in the UK. Now that makes me feel old...

Patron's Report

Which leads me neatly to my next point. Dentistry can take you anywhere. When I was leaving dental school in 2003, if you had told me that I would be sitting at my kitchen table in Adelaide, beer in hand, writing the Patron's Report for the Adelaide University Dental Students Society end of year magazine in 2022, I would have thought you were mad. Apart from the beer in hand bit. And yet, here I am. You have all chosen a career that will take you wherever you want it to. You will have opportunities to do incredible things, and to make incredible differences to peoples' lives, as students and as graduates. There are not so many undergraduate courses that make you step up to clinical care in such a short period of time. It isn't an easy road to travel and you will need to learn on the job every day you practice. But in terms of reward, it is second to none. Just by choosing dentistry, you've already shown you guys are smart. For those entering the next year at Uni, commit to more hard work and good times with the AUDSS. For those leaving us, stay in touch and make us proud. We know you will.

With many thanks for having me,
Anna

Are you currently on a student visa and studying a Bachelor of Dental Surgery at the University of Adelaide?

Do you want to stay in Australia after you graduate?

PAX MIGRATION

President's Address

2022 has been the most ordinary year since the big CV19 happened, and how quick it has flown by, but like all good things they must also come to an end.

Thinking back to how it was in 2020 and 2021, when life was turned upside down, 2022 is a much different time to back then. I must commend everyone on well adapted we are to the new circumstances.

Soon enough, COVID-19 will likely become an afterthought, and life will just be like how it was pre-2020, just with more face masks (tbh... it's hard to recognise people without masks on now).

The year started off with another covid scare as they ever do, but fortunately life was back up and running as usual after a short break. Following the first three oral surgery lectures held by Dr Ven Woo and Dr Ken Lin, university truly started in March (to BDS2, enjoy your break as this will be the longest one in a while).

As is the annual tradition, the AUDSS year had the usual favourites - Freshers BBQ, Dent Camp and Grand Dental Ball among others. With each event, the everchanging restrictions and circumstances made for an everchanging schedule and delays. Fortunately, despite delays, we were able to hold all our events, which could not have been possible without the support from our major sponsors Wright Evans Partners, ADASA, Guild indemnity insurance and PAX migration lawyers. Without their immense support, we couldn't possibly have hoped to do as many activities, and we are so grateful for their continuing support.

Following on the success of 2021's inter-society events such as the AMSS x AUDSS dodgeball and ADASA x AUDSS R U OK day, these became a must for 2022. Building on forming a tight-knit community across universities and across professions was one of my goals for this year. With the Australian Medical Students Associations (AMSA), the dodgeball event made a comeback for this year and the rivalry was ever bit still "friendly" (Esther's words – 2021 AUDSS President). We still suffered a loss, however, with a social gathering at Atlantis (our most visited spot in Adelaide), the night ended on a high note. It would be great to see this friendly competition grow to include more sports (maybe this time we'll win).

With the help of the ever-present Edward Miller (BOH Liaison) along with Ronan Young (sub-BOH Liaison), the participations from both dental and oral health cohorts continued to grow. I do hope that this integration continues to grow.

President's Address

All I can say is – 2022 has been another momentous year! It has truly been my pleasure and privilege to have served as your President and lead the society alongside an amazing committee. Without the core executive team Denise as secretary and Roderick as treasurer and the whole 2022 committee, this year would not have been possible. Thank you so much for all your hard work and for meeting challenges head-on and surmounting any obstacles. I am very proud of all your achievements throughout this year. I must give special mention and my immense gratitude to Dr Anna Murray who provided her wisdom, invaluable advice, and assistance as the society's patron. It has been a pleasure working with you!

Finally, I wish the 2023 team the best of luck. I have full confidence in next year's committee, and Fiona Guo and Nadia Heng in leading the society to the best of their abilities. My best advice to you would be to keep the communications channels open, and to most importantly, have fun!

Au revoir.

Derek Li Kwok Cheong
AUDSS President

Vice-President's Address

Another year has come to an end, and it truly has been a great one. 2022 has been the year where things started returning back to normal pre-COVID days, minus those tight-fitting N95 masks. The year started off smoothly with welcoming Dr Anna Murray, who has been a lovely and endlessly supportive patron to the AUDSS this year. We've further explored the idea of clinical and lab shadowing within the Adelaide Dental Hospital and the degree of interest expressed from the students has been spectacular. Whilst the pilot program is still being finalised, we are excited to see the 2023 committee further develop it.

Discovering the lost storeroom in Helen Mayo is probably one of our biggest achievements, so future committees can thank us (specifically Derek, overworked Honours student) for that.

We would not have made it through the year, had it not been for Denise who's done the most spectacular job as our secretary. She's always been there, whether it be organising another meeting in preparation for upcoming events or filling in for a meeting while one of us were away on placement.

The AUDSS finances has remained positive despite the global inflation thanks to Roderick, our treasurer, and Derrick and his sponsorship team. They have helped us strengthen our relationship with our long-term sponsors like Wright Evan Partners, ADASA and Guild insurance and brought on many new sponsors and sweet food deals.

Sukhmani and Brendan with their Student Affairs team have organised numerous AAPDPs, workshops and grad talks on just about every topic of dentistry that the school does and doesn't cover. Showing BDS1 how to hide the flaws in their rubber dams for their practical assessment was also quite an experience!

Where would the dent camp, all the pubcrawls, and the grand dental ball be without the events committee, led by Annika and Matviy! The tremendous amount of behind the scenes work that the team has put in to make sure that we can all have a good time cannot go unnoticed. Not being sent any invoices for damage post-event is another plus! Marketing team, led by Ashi, worked closely with all other portfolios and provided us with the most beautiful designs for banners and apparel. Their talent is showcased in the Insta stories they put up, which also improved our social presence.

The publications team, led by Jingyang, took AI Dente podcasts to the next level covering diverse topics starting from ILA to specialties like OMFS and Special Needs Dentistry. Jingyang is a talented host and all 9 the episodes have been informative and enjoyable; minus the one where we had to listen to our own voice.

Vice-President's Address

All the events organised by Renya and her comm aid team including the SleepOut and Trivia for Timor has been a huge success and they've also helped bring our relationship with Adelaide Medical Students Society (AMSS) together by introducing the food drive.

Last but not least, our IT team, led by Doug, has done an amazing job introducing some new technology like digital memberships and the AUDSS Discord channel to help transition the incoming committee and facilitate communication between different portfolios. Thanks for being our tech support for just about everything.

The AUDSS calendar has definitely been full on with social and academic events throughout 2022, and I would like to take this opportunity to thank all the committee members and staff for the time and effort they've put in to organise and run these events successfully! As the year went on, we could really see ourselves growing as a team, and whilst it's sad that our time has come to an end, we're so proud of all the achievements we've made together.

All the best to the incoming committee of 2023, it can be challenging at times, but will definitely be one of your most rewarding and memorable experiences!

Scarlett Kim
AUDSS Vice President

Secretary's Report

"I like firsts. Good or bad, they're always memorable." —Ahsoka Tano, The Mandalorian

Pre-clinical weeks rushed past before I could catch a breath, and soon we were welcoming our spirited Freshers, greeting our lovely Patron, Dr Anna Murray, and taking committee photos. Social and educational events were lined up one by one – I was most excited for this year's Trivia for Timor, a fundraising quiz night! While we were supporting a meaningful cause, it was also a nice get-together, catching up with our year mates who we barely see throughout the week due to our busy clinical schedules. I am definitely looking forward to attending future runs!

It has been a rewarding experience working alongside the various portfolios, and being able to support them wherever possible. Taking on this role has helped me grow as an individual and team player. The dedication I have seen, perspectives the committee members shared, spirit and efforts invested were admirable.

To the amazing committee and everyone involved in the AUDSS, thank you.

As the year comes to an end, hope you enjoyed the eventful year as much as I did, and have forged long-lasting friendships.
To the graduating class, congratulations and all the best for your future endeavours!

au revoir
Denise Yap
AUDSS Secretary

Treasurer's Report

2022 was a stunning year. It has been a great pleasure being your Treasurer and working alongside many of you. A special mention to Sponsorships (who have done an incredible job getting all our sponsors this year) and all other portfolios, who made it possible to have our events this year and still stay in the positive.

This was a year where expenses seemed to have shot through the roof. From food and drinks to accommodation and bar tabs, everything rose in price due to uncontrolled global events. We tried our best to stick to the budget but understandably we ended up slightly over. To offset this, we had to up our prices some events (as many of you have noticed). This has allowed us to enjoy the events we love every year and still keep our balance sheet in the positive!

Earlier in the year we looked at a new digital way of implementing AUDSS memberships which made it easier to keep track of members and possibly open up a way for new payment options in the future. All expenses and revenue throughout the year were meticulously imputed into a spreadsheet which it made it a lot easier to track each portfolio's expenditure at a glance. Apart from a few unknown payments with our contactless Square machine and some budget discrepancies, everything was smooth sailing.

Overall, it was an enjoyable experience for me to meet and work with my fellow upper year execs. Thank you for helping with my transition into this role and best of luck for the future!

Roderick Choi
AUDSS Treasurer 2022

Partnerships Report

What a year it has been for the Partnerships portfolio. Significant benefactions had been made to the students from all our sponsors, old and new. I would like to acknowledge the strong ongoing relationships the AUDSS has with our principal partners who have stuck by us through thick and thin: Wright Evan Partners, the Australian Dental Association South Australian Branch, and Guild Insurance.

There were many highlights throughout the year, made possible by the substantial income received by the AUDSS. The Loupe trade show was a success, new food deals were made and the running of our remarkable talks and events were ensured by the keenly attuned Student Affairs and Events team respectively. We also saw an influx of myriad private clinics across Australia offering financial support and unique graduate opportunities for the outgoing Adelaide dental students. The graduating cohort will also receive the "New Grad Pack" that Chris curated last year to help them in their dentistry journey in their first year out. Best of luck.

To round off 2022 on a great note, I would like to express my gratitude to the executive team members, especially Derek and Scarlett (President and Vice President). A special thanks also to my general committee members, Eda and Shane who have performed admirably this year.

It has been my pleasure to see everything all come together and I hope that Partnerships will continue to enable exhilarating content for all dental students.

Signing off with joie de vivre,

Derrick Zheng
AUDSS Partnerships Executive

Student Affairs Report

If there's one portfolio which spits out a LOT of dental facts, it's undoubtedly Student Affairs. With 2022 coming to an end, there truly comes a moment when we begin to reflect upon the amazing (yet also stressful :P) moments throughout this year. As your power duo and wonderful executive officers, we are so grateful to everyone who comes to our events and helps us to pull off this amazing feat. Timely communication and emailing has played a huge role in facilitating the premise of extracurricular learning which I am sure everyone in the AUDSS is grateful for.

We would love to give a shoutout to our amazing general & sub-committee who have been liaising with dentists and specialists throughout the year to help bring these events to fruition. To our speakers, dentists and dental representatives who presented and participated in the MI Workshop, Endo Access Workshop, AAPDPs, SSCs, Grad Packs -> your efforts are simply immeasurable. Thank you for sharing your clinical wisdom and helping us to become better dental practitioners for the future. To the seniors of AUDSS, we are super grateful for your time in helping us to hold 2 Buddy Day events for our incoming 1st year buddies in slowly getting accustomed to dental school.

Thank you so much for an amazing Year!! Good luck Andrew Chan and Daniel Lim in 2023. I am sure you will both do an amazing job as future exec leaders in the Student Affairs portfolio.

- Sukhmani and Brendan

Community Aid Report

Another year of Community Aid done!!!

It has been an absolute pleasure being your community aid executive officer this year, and seeing some of you guys at our events :-)) I hope you had a great time giving back to the community we live in!

This year has been our first “normal” year post-COVID and we have been so fortunate to have our lifestyles *pretty* similar to what it was pre-COVID (I’ve personally sacked the face shield to go over the Detmold masks though). Giving back to the community as part of the AUDSS was incredibly fun and rewarding (and also extremely busy). Obtaining donations which would act as incentive for students to attend was a challenge, but it worked in bringing more students to our events- congratulations to y’all who won the Yo-Chi and the Marrakech vouchers!

I would also like to thank my general and sub committee who have put in so much effort into organising and hosting this years’ events- the community aid portfolio would not have been as successful without you (especially when I caught COVID after a bender weekend and was instead shivering on my bed on the night of SleepOut- not great timing!!). This year, we also succeeded in our aim to increase student involvement and fundraise to help communities in need.

Sausage Sizzle

Held in collaboration with ADASA, it was great to see students come down to grab a bite after clinic (sorry no free KFC/ pizza this time), and to see so many people enjoying themselves on a Thursday afternoon!

SleepOut

Unfortunately I had caught COVID and was unable to be there, but I did see lots of pictures and videos of those who came to support the cause on a cold Friday night in the middle of winter. It looked like a great time, and the food especially looked amazing! Thank you to those who fundraised, donated and bought raffle tickets!

Dental Health Awareness Week (DHAW)

Of course, freebies are the way to everyone’s heart- many students flocked to our stalls at the Hub and at the AHMS to grab some Colgate, Oral B and Sensodyne samples. We also provided oral hygiene instructions. It was great to see non dentistry students engaging and asking specific questions about their oral hygiene!

Donation Drive

This was the first year that the AUDSS has held a donation drive. This year, we also decided to do it in collaboration with the AMSS- honestly a huge success with numerous donations which took us quite a while to sort through. The donations were provided to The Welcoming Centre, which supports refugees. Thanks to all who donated!

Community Aid Report

Trivia for Timor

Organising Trivia for Timor was by far the most stressful, especially because I didn't want to disappoint Dr Lerche- I've heard that he has a 5483 page book of fun facts that he reads in preparation for Trivia for Timor. I hope the questions didn't disappoint him! The night flew by so quickly and was amazing, with everyone indoors on a Friday night when it was raining cats and dogs outside, the room was filled with laughter, people fighting over the silent auction for the abnormally large teapot, and Dr Li buying \$100 worth of raffle tickets.

Thank you for an outstanding year and your participation to make the most of 2022! Good luck to Vatsala Bhatia, I am so excited to see what 2023 offers!

Signing off xoxo

Renya
AUDSS Community Aid Executive Officer

IT Report

It's been a pleasure being the "AUDSS tech guy" this year in addition to my usual role as the "class tech support". I've overseen a number of technical changes implemented this year ranging from ticket sales, membership sales, usage of Discord for AUDSS committee work, to redesigns for the Al Dente podcast.

I'd like to thank the other committee members of the AUDSS for trying out Discord as the committee workspace this year on my recommendation. Although there was a learning curve for some, we've been able to observe some significant advantages including increased organisation of planning as well as archiving of relevant topics for next year's committee to peruse if needed.

I'd like to recognise Ashi's efforts that converted us to using QPay this year for AUDSS membership purchases. With QPay, we've been able to design and integrate our slick new digital wallet passes for AUDSS members that are a vast improvement to the old boring stickers that have been used since I was in BDS1 (and probably earlier).

Thanks also to James Paik, my general committee member, for diligently uploading GILs and other academic resources on behalf of Student Affairs (Suki and Brendan).

Thank you Derek, Scarlett, and Denise for always keeping me well organised and giving me constructive feedback on how to further improve the site and committee Discord.

Thanks Sponsorships (Derrick) for keeping me updated about the latest hot deals you've secured for us so that I can ensure the site is updated as well as pass the info onto the students.

Thanks Mr. Roderick the Treasurer for working with me to sort out all the Square and banking mysteries that we encountered earlier in the year. I admire your thoroughness and meticulousness when hunting down and solving discrepancies in the numbers.

Thank you to Events (Annika and Matviy) and Marketing (Ashi) for always responding to my inquiries in a timely manner and providing me with everything I need to construct whatever page is required for an event.

It was a pleasure to work with Renya for the two signature Comm Aid events of Sleepout and Trivia for Timor. The technical side of these two events went incredibly smoothly this year thanks to her dedication, preparedness, and remarkable communication with her committee and myself.

Thank you for Jingyang's patience as we had a series of road bumps at the beginning of the year trying to change the podcast over to the new name and design. Your dedication to the podcast is admirable and your enthusiasm as a host is obvious to all the listeners. The next Publications exec has big shoes to fill!

IT Report

Lastly, there are a wide array of small changes I've made to the backend of the website in order to clean up clutter and make it easier for the next IT Exec to carry on the torch. At the time of this article, my successor hasn't yet been elected (editor's note: congrats Brendan Nham!), but I'm sure that they will do an excellent job of continuing to fulfill the integral responsibility of IT.

May the IT Gods be with you,
Doug Lam, AUDSS IT Exec 2022

Year Reports

B D S 1 R E P O R T

There's no way you've gone through this year without being asked, "How's dentistry going? First year going well?" Out of courtesy, you've either said, "Oh it's good" or, "My stress levels are going through the roof"—usually with no in-between. So open wide and let's look back onto the "in-between" of BDS1...

A quick rundown of the AUDSS events, for the year group that "attends the most events". It all kicked off with Buddy Day, where I knew more buddies than people in our actual cohort. Who knew this wholesome sit-in-a-circle-and-mingle event was followed by our first encounter of the AUDSS go-to club, Atlantis, for the Traffic Light Party. Getting relationship advice from a third year in the Atlantis bathrooms was an alternate way of meeting upper year buddies, surely.

Freshers' BBQ was our next taste of what the AUDSS had to offer. A 12pm boat race introduced us freshers to the cariogenic tradition of the dental cohort. This inter-cohort competition made its second appearance during the annual Dzintari 'Dent Camp'. Hosted on the day before our very first summative test, 'Dent Camp' was a concoction of unexpectedly impressive superhero-villain costumes, cowboy rowdiness and a reminder to revise the lyrics of 'Untouched' by the Veronicas. Special mention to our uncoordinated, inter-year assembly of Jokers on the first night.

Soon after the fun and games, we had our very first clinic session at the clinic—where we still get lost at—TAFE Gillies Plains. Making non-lethal mistakes within our clinic trios (e.g. when my operator's tweezers mistakened my labial mucosa as a cotton roll) put our patient confidentiality skills to the test. But most importantly, we felt like real dentists for the first time.

Outside of Friday clinics, we were in the simulation version on Tuesday mornings. Lugging around our jingling Daiso boxes from 9am to 5pm became a stark personality trait of the BDS1 cohort. Here's to tripling the frequency of sim clinic sessions for BDS2! *suggest you dab after this, instead of raising a toast or the like*

BDS1 REPORT

In between events, the mostly male cohort of BDS1 feasted their eyes on the treasure of the 24-hour Derrimut Gym. Known as their second home, the top of the Rundle Mall KMart was most likely more visited than the Tuesday afternoon 'Consolidate Apply Discuss (CAD)' tutorials at Helen Mayo South.

The female equivalent was, surely, the showcase of pilates reformers on our Instagram stories. Whether it was to rehabilitate our declining ergonomics in the sim clinic, or to burn off the CnB Burgers we used as study fuel, suffering together in pilates was a surprising form of stress relief that we can all benefit from.

Speaking of keeping fit, this brings us to the most active AUDSS event of the year—the AMSS x AUDSS Dodgeball Tournament. Battling the "real" doctors, knowing that we were all equally important healthcare workers, brought the dental dodgeball team to a sweet victory in the final showdown.

On a more academic note, here's a quick throwback to the infamous 'feline comparative anatomy' exam question. Oh, and the 4-assignment week (5, if you had radiography) following our Sem 2A Summative Test. The only way to cope with this stress was to drink our worries away with ironically sugary drinks. My most embarrassing memory this year was walking into a CAD 20 minutes late with Gong Cha in one hand, and Dr Parker asking where her share of bubble tea was. Nonetheless, our soaring stress levels were always comforted by the humbling "Wait, that was a cat? I thought it was a frog" group chat messages seconds after the exams finished...

BDS Class of 2026 group chat highlights

- Ryan "Loosest-Unit-Award" Nahza and Krishna "Krish" Parmar competing for chat comedian by sending post-exam memes
- 70% of the chat consisting of events reminders (shoutout to the select few who emoji-react to them)
- Messages "going over the word count"
- More emoji reactions for messages for pub crawl or afterparty updates compared to GILs or charity events

B D S I R E P O R T

The philanthropic side of BDS Class of 2026 also revealed itself over this year. Lending a helping hand at the St Mary's Magdalene Church by serving three-course meals to homeless and underprivileged guests was a way for us to continue helping others outside of the clinic doors. It was rewarding to serve and get to know guests like James, whose family was "all criminals" but studies constitutional law in his free time, and who recommended me a couple of Australian-published novels.

The AUDSS Comm-Aid Sleepout was also a night of charity and camaraderie, especially when the sole BDS1 Team + AUDSS Secretary Denise won first place in the mini-competitions (see below for the award-winning shrek cookies). Also, a shout out to Yemo "Minju" Koo for buying the 91-100 raffle tickets when ticket 90 was drawn for Prada sunglasses and ticket 101 was drawn for 4 Adelaide Zoo tickets.

The Insight Amazing Raise was also a charitable success, as Team 'The One Dentist that Doesn't Recommend' collected over 40 business cards as a special mission. Arnav "EBD-Lover" Kapoor, Lora "Dong" Ding, Hana "Mighty-Midget" Asyrua and Ajay "Sesh-Gremlin" Rindani found themselves scoring a free \$15 Yo-Chi voucher each, and calories burned from their stroll through the (wrong) botanical gardens.

Last but not least, was our Grand Dent Ball at the InterContinental Hotel. An upgrade from our blue, Friday clinic coats, our Saturday night suits and gowns seemed to be the "stars" of the night (in reference to the "Starry Night" theme). However, the events following the closure of the ball were vaguely similar to those of the dental pub crawl earlier this year—living up to the "party enamel" title.

It's been ??, so please rest up and "try to look after yourself" like Mr Joseph Peel (ILA 1.1, 2022)!

— from Val :) (Valerie Yung)

T

B D S 2 R E P O R T

We started second year on Monday, the 14th of February. Yes, Valentine's day. Did that make it the year we all fell madly in love with dentistry, ready to give up our free time and sanity in exchange for a "satisfactory" rather than "borderline" composite? The jury's still out on that one. Truthfully, I've spent a lot of this year counting down: counting down the days until mid-semester break, counting down the minutes I have left to complete this restoration, counting down the lectures I still have to catch up on. So, for this review of second year, it seemed only right to try counting forwards this time—reflecting on the experiences we've gained this year. In true haphazard, non-systematic student fashion (sorry, Dr Lekkas), I've missed a few along the way, but I'm sure you can fill in the gaps with your own crazy year.

Two is the obvious choice to start with—it's the number of years we'll have made it through by the time the Probe is released. That's 40% of our degree. Exciting? Scary? A bit of both.

Three is the number of sim sessions we suffered through every week. They say that good things come in threes, but I think anyone who's come out the other side of BDS2 would beg to differ. Three different tutors, three hours listening to the suction, and three perfectly good plastic teeth to destroy. We've learnt how to hold back tears when Dr Dina (fairly) roasts us, straighten up when Dr Lerche creeps up behind us, whip the burs out of our handpieces when we hear Dr Poppy's mic crackle on, and ask Dr Sandra what she's making for dinner. It's true, what every upper year tells you about BDS2 sim: it's tough, demoralising at times and soul-crushing at others. Three sessions per week is a lot when you suck in every single one. Especially when the person sitting behind you produces a work of art to rival Picasso, then saunters out at 2pm on the dot. (Yes, Bobby, that's you.) But, from satisfying incisal fractures to dreaded cusp replacements in amalgam, we slowly saw improvement. My manikin no longer bites together, but it takes me aback to look at the shapeless, leaky fillings I have from the start of the year and compare them to the tooth-like structures sitting alongside them. Plus, my parents are now convinced I could work as a qualified dentist.

Four is the number of muscles of mastication. Or do we count the digastric? There's nothing quite like breezing into Dr Ranjitkar's classes half an hour late with an iced coffee in one hand and an iPad in the other, only to realise you could've waited another fifteen minutes because he's still cracking jokes. We never quite worked out how that photo of a horse was relevant to so many anatomy topics, but it was pretty cute.... Following such informative lectures, we had the opportunity to get up close and personal with the cadavers in the Ray Last Laboratory. The scent of formaldehyde made us weirdly hungry, but somehow it felt wrong biting into my sandwich after listening to my group talk about how much human remains look like shredded chicken.

Five is the number of hours of we sleep. When they said second year keeps you busy, we foolishly assumed they meant... year twelve exams busy. Working 40 hours a week at your summer job busy. Two of your friends have birthdays on the same day busy. Nope, they mean BDS2 busy. Does anyone else have constant migraines?

Seven is the hour I was blessed to leave clinic on days when all went well. Praise be to Dr Wissam and our common desire to just go home. Night clinics (plus the subsequent dinners) are something of a dental students' rite of passage, but it's one I could pass on. Being in the ADH came with its pros, like no more damp dusting, and a stunning sunset over the city for us to stare into while being berated by our tutors... and naturally its cons, ranging from the skinny lockers to the clunky continental delivery system. It's not like I really wanted to dry the teeth in quadrant two, anyway.

Eight is the number of family and friend clinic sessions we had. It was a little weird to not be able to turn to our patients and whisper, "um, have I forgotten something?" We're grateful to the roommates, mums, boyfriends, and sometimes total strangers who signed up to be our guinea pigs over the past few months under the guise of "free dental treatment." We proudly took our first x-rays on real patients, practised debridement on perfectly clean teeth and familiarised ourselves with the maze that is Titanium.

Ten is the number of sore fingers we each had after perio workshops with Dr Selbach. Plus two sore arms. Still, it was pretty satisfying to see that pink glitter nail polish scraping away. I'm grateful to Casey (more properly known as Acacia Lord, BOH) for sitting in a row near me so I could vaguely copy what she was doing.

Twenty is what felt like the number of lectures we had each week in Sem 1. Embryology, endocrinology, odontogenesis, microbiology... I'm not going to summarise them here. You've all suffered enough.

Twenty-five is the approximate number of people who attended our local anaesthesia ILA :/ The class of 2025 rests easy knowing that LA refers to the city of angels, a block is a boxing move and nerves are what you calm by breathing deeply. Burnout hit the BDS2 cohort (and our attendance levels) pretty hard in this last stretch of the year, but still, we've learnt a few things in Barr Smith South. Reading a pedigree is kinda important. TRIM is essential. CLP now means cleft lip & palate, on top of clinic learning plan—what was that Dr Lekkas said about not over-abbreviating?

And for an honorary decimal, **0.05** is the number that we no longer use to determine the outcome of a research paper. Dr Haag may have killed the p-value, but she saved our year in EBD with her easy-to-follow slideshows.

So, maybe it wasn't quite the year that we fell head-over-heels in love with dentistry. Maybe it was a year we're all glad to see the back of. But it was also the year we got to experience what it's like to work inside the ADH, invite patients into our chairs, drill and fill (on plastic), calm angry patients during VPP and juggle enough tasks to rival a circus. Thank you and goodbye, BDS2!

-Ella George

Practising our hand skills at SleepOut!

On our way to Atlantis in March, ready to corner some freshers and give them unsolicited advice like the dental veterans we are.

Some of the second years at ball :)

B D S 3 R E P O R T

Being ½ dentist and ½ dead, we meekly shuffled into PCPC clinic with the shared sense of impending doom clouding over everyone's minds – i.e., meeting real patients. Gone were the days where we could twist our sim manikin heads beyond the extremes of normal human anatomy and doing the same to our heads so we could use direct vision in all situations.

Consequently, with our skills severely lacking (and our confidence even more so), we charged on into battle. To be fair, our patients had their own battles to fight as they lay in the appointment chair for a straight 2.5 hours for half an exam. Some chose to retreat and didn't even show up, which we celebrated before realising the FTAs just accumulated and we didn't have enough work to be marked on. Cue the panicked calls we would bombard our patients with (sometimes at the ungodly hours of 8am) as we borderline begged them to come in so we could have a chance of passing the year.

The shared trauma of our first real patient experiences resulted in questionable competitions – who had the least cons? Who had the most FTAs? Who had the most cleans? Yet throughout all our fumbling around the clinic with our clunky face shields (that we bonded over our collective hatred for), we encountered a range of cases and patients throughout the year (that, honestly speaking, no amount of VPP could have prepared us for) – from ones we couldn't wait to refer off to ones we ran back to our tutors for help with (just as we did for almost everything else in clinic).

Alongside our new schedule of 2 clinic sessions a week, this year also marked our first time with a perio support tutor. The game of perio bingo began as they checked every single pocket down to the mm and we would change the numbers as we slowly realised how wrong our perio depths were the more they progressed through the mouth. A game of Guess Who (Titanium version) was also played as we struggled to find correct Titanium codes among the thousand other codes we didn't even know existed (and to this day, still don't know about).

This level of chaotic energy was mirrored when we proudly celebrated our first cohort representative in the exclusive Adelaide Uni Love Letters (☺☺), and in a similar tumultuous fashion, our lectures followed suit, especially with the chocolate missiles in perio.

With semester 2, and thus, our BDS3 half ball, around the corner, we also held a bake sale to raise money the ball. A big thank you to all who supported the sale, including many of the dental school staff (not to mention Dr Lekkas, who, for very good reason, convinced customers to buy the sugar free brownies. Get on top of that OHI, guys.) We enjoyed the fruits of our labour throughout these long, arduous years at the ball, where awards were presented, and Dr Lekkas and Dr Ranjitkar won best dressed (and rightfully so).

It was also in semester 2 that we had our first taste of the specialties, starting with our fixed pros 6-9pm sim sessions, where we discovered our mutual hatred for the ProTemp4 temp crowns (god only knows how many we made just to end up with an equally bad, or maybe even worse looking, final temp crown). Endo sim sessions came soon after, which proved to be an onslaught of obstacles one after the other. From fishing out hundreds of dollars for fake teeth from our already severely worn-down bank accounts to lining up for half the session just for an x-ray – I could go on further but I wouldn't be able to fit it all here (like how the endo teeth don't fit in our models and we had to glue them in with wax, making them stick out way above the occlusal plane. Most severe case of supraocclusion most of us have seen, I'm sure.) The only saving grace we could turn to in these troubling times was Dr Aaron Seet – bless him and his trusty endo microscope.

Our struggles only continued, manifesting this time in our ongoing conflict with FeedbackFruits in ortho (I can never see fruits the same way again). The slew of assignments and presentations this year only added onto the havoc (not to also mention VPP round 2, which deserves its own section so I can delve into all the creative ways we used to wriggle our way out of the scenarios).

BDS3 came with its own ups and downs but at the end looking back on it all, we came a long way compared to where we started in the year. It was a big year for all of us. We were able to put into practice everything we've learnt across the years and finally combine it all to do what we all came here wanting to do - build patient relationships, manage their oral health and treat their dental problems across multiple appointments. For organising this entire year and allowing us to grow as clinicians and people, I'm sure we cannot thank our coordinators, Dr Stow and Dr Murray, enough for chasing us up on forgotten work and for the timely announcements (which I'm sure all of us needed at one point or another). Most importantly, thank you to all my fellow BDS3 classmates, who have kept me company throughout all the 8am lectures, the 6-9pm sim sessions, the ortho CBD sessions and more. I'm proud of all of us for sticking through to get to this halfway point and can't wait to see what else we get up to in the remaining 1/2 of our dental school adventures <3

-Dalena Ly

B D S 4 R E P O R T

BDS 4, 80% dentists, so close yet so far.

The year kicked off with PCPC and us bleary-eyed as we carried our toolboxes and dragged our unwilling bodies into a hub central so empty we can hear our echoes. Things went from 0-100 as we started our 8 to 4 grind from the very get-go with lots of fixed pros and endo. After a gruelling month with lots of tears, sweat, sleep debts, fixed pros debts and COVID scares, we successfully made it out ready for some real work in clinic.

Dentisting 101 begins we start semester 1 clinic and got gobsmacked with a whole sea of different specialities. For the first time ever all these years, state-wide clinics became part and parcel of our schedules as everyone scrambled to find their way to Marion, Gilles, Noarlunga and Elizabeth. Suffice to say, these journeys were filled with excitement and also lots of panic as we battled the morning traffic to get there on time. Though hectic, it was truly rewarding to begin our learning in a huge array of specialities and finally seeing the bits and pieces of clinic come together into one holistic treatment plan. Honourable mention to our batch for being the first batch to do pen and paper assessments since COVID hit. It was at this moment when we realised, the keyboard is mightier than both the sword and the pen (aiish).

Of course, BDS 4 is not just all work and no fun. As a batch, we are determined to show everyone what work-life balance is as we, the reigning champions of Boat Racing, never fail to disappoint with our stellar extra-curricular records. At Dent Camp, we yet again defended our Boat Racing title and won Scavenger Hunt. From the looks of it, we shall once again prove our excellence until we graduate (sorry other years).

To end off an eventful semester 1, a good number of us went for the ADSA Melbourne convention, enjoying some relaxing hot springs, gala ball and trade shows. Truly a well-deserved break.

Figure 1: Dorm shot at Dent Camp 2022, everyone loves a good break from school.

B D S 4 R E P O R T

Despite a measly 1 week July break, semester 2 started off on "high hopes". What first greeted us all were the 100+ deadlines that MyUni vomited into our inboxes. Clinic upped a notch as the looming unit requirements got our group chat buzzing alive with requests and refers. Lots of us also got exciting opportunities with SNU observations and increased OD opportunities, a nod to our tireless campaign against OD inequality. Needless to say, the highlight of this semester is the placement preferencing scheme that will quite literally determine our lives for year 5. Without a doubt, much excitement and anticipation is expected as we now know where we shall go to for placements and who we will be living with under one roof for 3 months.

To end off, 2022 is a year of many firsts. First time heading to new state-wide clinics, first time using the lab boxes and first time knowing belongings can get stolen at level 10 (wow indeed). Despite all the ups and downs of this rollercoaster ride, all of us cannot be more excited for year 5 as we make the best use of our last year in BDS as budding dentists. Thank you to our amazing lecturers and tutors for solidifying our foundations and inspiring us in our dental journeys. And of course, a huge thank you to the batch of 2023. I'm honoured to have served as your class rep for the past years and will definitely miss your faces as we head off for our placements which will carry us far and wide.

-Angel Feng

Figure 2: The 2022 obligatory end of year class photos as always, feat. Margie who unintentionally photobombed us with her ever jolly bright pink hair.

B D S 5 R E P O R T

If you think studying four years at the second-best dental school in all of Australia (25th in the world), would make the final year the EASIEST of them all - you'd be absolutely, 100%, **right**. After spending a whole year learning how to retract a lip with a mirror AND a cotton roll; one year charting 5mm pocket depths in family and friends (or in some cases the random guy in the food court 1 hour before); one year spending 2.5 hours for a comprehensive examination; and then BAM a year of almost every dental specialty on a fortnightly basis – what more preparation did we need for the gruelling 1.5 days of clinic per week in fifth year.

After returning from a 4-week summer break, we were back to school with a week of preclinical lectures that were examinable (this meant attending the zoom, and then once the exam stress kicked three months later, view it again, this time paying attention – not recommended). Then, some of us left Adelaide to begin our rural/interstate placements, while others in metro clinics enjoyed a few more weeks break while COVID protocols were being established.

Rural placements are determined by the 'Craven randomisation algorithm' – you put in your preferences for rural + metro placements and then are *randomly* assigned a stream. I was assigned to Whyalla, the more *rural* of the rural placements, unfortunately (or so I thought). As with everything in life, it's what you make of it and the people you're with, and this is what made rural placement in Whyalla some of the best time of my life. Sweetened by perks such as 5-min walk to clinic (yes to waking up at 8:25am and making it to clinic on time for a 9am patient), weekly cleaning ladies (<3), and own bathrooms (sorry to the med students we evicted because we caught COVID). We sampled the local cuisine, visited the local sites, joined the gym, and I personally took part in my first triathlon!! There were taco nights, rice paper roll nights, learning to shotgun + vortex a beer, and a cheeky visit to the Port Lincoln group for some seafood + rock pool snorkelling + oyster tour. Thank you so much to the staff at the rural clinics for accepting us and ensuring we abide by clinic protocols. And thank you so much to the tutors who make the trek to each of the rural placements so that we were able to get a taste of rural practice. To the younger years, rural placement is something to look forward to. For these one or two 3-month blocks, it's (ideally) 5 days a week of clinic, which is the closest you'll get to the real world; and exploring and trying new things such as a new city/town are one of the joys of life.

B D S 5 R E P O R T

Metro placements are 1.5 days a week at one of ADH, Gillies Plains, Marion or Noarlunga. 1.5 days means 'ample time to study' for the end of block exams or completing the online modules that are sprinkled throughout the year, giving us those last few tidbits of knowledge on the GDP + specialties, as well as intro to implants. Some people have taken up to getting part-time jobs, usually as DAs, with the extra time. Highly recommend getting in earlier in the year. By around August, the DA jobs aren't too keen on training you just to work to the end of the year, and are instead interested if you are able to stay on – in which case it's a perfect for getting a foot into a job (if you aren't interstate or international). Some students are getting on with their honours. Some are getting on with SNU rotations (keep in mind if you're interested in this, you need to pick your placement preferences such that Thursdays are open). Limited clinic times also means needing to get clinical experience elsewhere, through shadowing practices or specialties of interest, or logging a few volunteer sessions at Common Grounds or the OMSU.

It's the final year and time spent with others definitely hits a bit different. Whether it be at the last few uni events (ever) or seeing the cohort all together for a(n) lecture/exam, in a few months, everyone's going their separate ways. Highly recommend the Marion group (or any clinical placement group for that matter) to go around to the local pubs and enjoy the parma + pint deals. Whether it be to avoid the peak hour traffic, recover from a full day of getting grilled by Dr. Vu, or spend some time in the company of people you've seen for years but never really got to know.

To the staff at the University of Adelaide Dental School retired and present – coordinators, lectures, and tutors, thank you so much for what you have given us over these past 5 years. The progression of the clinical experience (especially relative to some other courses) has been great, gradually easing us into the challenge that is clinical dentistry and all its branches; as well as the lectures + ILAs which allow us to explore important concepts, and *experience* a patient before seeing them for real in the dental chair. Through the transition from the old dental hospital to the new one (and all the challenges associated with that), as well as the more recent and *unprecedented* challenges that came with COVID, we know you have had and will continue to have the learning and wellbeing of the students at heart. Thank you to the recently retired Prof Skinner – I do not think there was anyone more fit to teach patient-centred care, and has personally shaped my practice for the better. Thank you to our coordinators: Prof Parker (not Farmer @Kamran) for your teachings in cross-cultural communication, an integral part of Australian culture; Prof Lekkas for your unbelievably hard work throughout and coordination of BDS2; Prof Lerche & Prof Stow for getting us through BDS3/COVID in (relatively) one piece; and Prof Broughton, Prof Yakin and Prof Barazanhi for getting us through the debacle that was online invigilated exams and providing as much catch-up clinical experience as possible in BDS4 and 5.

To the younger years, take advantage of the plethora of resources and clinicians available to you at the University of Adelaide. Do a research project, shadow a specialist or general practitioner, or just pay attention to the ones sharing their knowledge. You only get to do dental school once, and it's only the career you'll be practicing the rest of your life after all.

-Vincent Nguyen

BOH R E P O R T

Firstly, I'd like to congratulate everyone who has made it to 2022 as a final year BOH student, and those who are on their way! I can speak for us all when I say that this whole course has been jam-packed the whole way through. From the first year when we all had no idea how to hold a mirror or what our tooth drawings would end up looking like. In the second year when we combined our theory and our practical experience when we expanded our knowledge of how the sciences can be applied to our patients, then the fact we saw real patients as well just made it even more hectic. But here we all are, in our final year! Completing our Oral Health Electives, whitening our teeth and really starting to cement our skills – and a few crowns as well! All stressing about who has and hasn't done a pulpotomy and if the tutor is going to find any remaining calculus at the base of that pocket will soon be a thing of the past! Who would have thought after three years of studying, all during COVID so we don't know any other way do we. Onwards and upwards as we start to look for jobs? But I haven't even passed my exams yet? Oh well I guess that's just the way it is, isn't it? Also, congratulations to those who have been completing the additional placement and assessments for the pilot program of extending our scope in the undergraduate course to look after patients of all ages with their restorative needs. Despite all that has happened, we made it! Well, this far anyway. can't wait to continue to learn and develop as a professional as we start collaborating with our wider dental team – yes that's you guys BDS5 even though we haven't ever had much to do with each other I am sure we will meet many of you in our future workplaces! - Edward Miller

BOH 2, hot dam! At this point it's more of a congratulations for surviving 2022, we've come so far from our first year developing into practitioners who I guarantee would look alien to ourselves a year ago. Confidence and competence are something I see in all of you, regardless of what other assessments have shown or made you feel I truly believe and see you all for the effort and development you put through. The camaraderie that we have is special and heartfelt, and something which I feel lucky to have and know has helped make this journey all a bit warmer, Thank you Erin for all the cookies (smart to start controlling the supply and demand of the industry for the future), Kim, Lauren and Lauren for taking on the rep roles this year and making sure we get the content we need, and everyone else for just making this the best cohort I've ever had.

BOH 1 for the brief time I've met you, I can tell you guys are smart and diligent enough to get through this too. Next year may be daunting, and there's going to be a very steep hill of learning and development, but what really matters is your heart, to be genuine, reflective, humble and compassionate are what will shine through. You will be meeting a lot of patients this year, and they will be in your care, but you won't be alone. Work as a team, support each other, because the strongest bond in Oral health are the ones you make with your friends. - Ronan Young

Be part of something bigger.

Individually, we can achieve great things. But when you belong to a community swarming towards a common goal, that's when we form our strongest line of defence, and the sky's the limit.

Guild Insurance and ADA SA have partnered for over 21 years now to protect the future of your profession. With us, you'll be shielded by a policy created from unmatched insight into your profession, access to legal support from Meridian Lawyers, one of the country's pre-eminent professional liability defence teams, backing from the industry body that stands up for Australian dentists, and so much more.

Together, we form the network that ensures Australian dentists don't have to fly solo.

OOPS!

With dental social media influencers on the rise and engagement on DPR ever increasing, it's easy to become disillusioned and doubtful of your own skills and knowledge. But mistakes are normal and common! We've all had to start at the beginning, and if you haven't made some mistakes, you probably just haven't done enough procedures.

Hopefully these stories remind everyone that mistakes are okay, improvement is why we're in dental school, and as long as we learn, and fill out the SLS, we'll be okay!

"Sent my patient home without a tutor check... so I gaslit Dr Wissam into thinking he'd already dismissed her ;D"- BDS2 student

"First ever filling in bds3 on a real patient, amazing anatomy, patient thought it looked amazing. Only when typing up my notes did I realise, I had never used any etch, primer or bond at any stage "- BDS4 student

"Couldn't remember the name of my patient when I went out to the waiting room, ended up calling the wrong patients name and bringing them in. Looked like a clown when I went out there again 30 seconds later and called out the correct name"- BDS4 student

"Swished a HS F20 bur down a patients oral cavity. After standard freak out moment, informed the clinic/tutor, sent the patient to ED for a chest x-ray, reviewed the pt and x-ray following week. After all that the patient apologized to me for causing such a fuss and let me make the dentures in the future. Morale of the story: don't rush an OD session, never discount power of building patient rapport/review appointments/courtesy calls and always check your burs are engaged before use"- BDS5 student

Class of 2022

Adam Babul

Adam

What would your job be if you couldn't be a dentist?

Probably a doctor

Which ADH staff member would you go on a date with?

Dr. Corfield 100%

Who is your favourite person in ADH?

my brother... only due to lack of options

What's the biggest lie you've ever told a tutor?

I love rem pros!!

What have you always wanted to do in clinic but didn't have the guts?

an amalgam tunnel prep

How long do you expect the restorations you placed this year to last?

Forever. Only expect the best from yourself .

Who from BDS5 would you never let work on your own teeth?

Nobody, everyone in BDS5 is amazing and would do a fantastic job! I can't think of a single person.

What dental instrument/bur are you most like?

maybe a mirror?? I like looking at myself

What are you going to buy with your first paycheck?

as many 10 leg multis as I can afford

"moisture control is a myth"

Afrah Dameer

Afrah

What would your job be if you couldn't be a dentist?

Florist!

Who is your favourite person in ADH?

Many people! From the tutors, DAs, admin staff, lab staff and security - people's energy, banter, corridor chit chats or simple smile can really mean a lot! It just makes the workplace environment much more comfortable, familiar and warm to integrate in!

What have you always wanted to do in clinic but didn't have the guts?

Irrespective of guts or not, I love to try new techniques or procedures, would be cool if we could have a go at surgical exos independently (with supervision of course haha)!

How long do you expect the restorations you placed this year to last?

As long as possible hopefully! Would be glad when my patients smile and keep chomping to their hearts desire for years on!

Who from BDS5 would you never let work on your own teeth?

I trust my fellow buddies, they're all fantastic and competent individuals! All the more options to pick a good dentist to take care of my teeth :D

What dental instrument/bur are you most like?

Polishing kit / enhanced burs haha - love the smooth vibes and bringing sparkle / shine to peoples lives!

What are you going to buy with your first paycheck?

Gonna take my family out for a fancy dinner and buy them exclusive prezzies!

"Smile big and laugh often! :D"

Andrew Murdock

Ange

What would your job be if you couldn't be a dentist?

Bean counter

Which ADH staff member would you go on a date with?

Tracey Winning!

Who is your favourite person in ADH?

My good friend FTA

What's the biggest lie you've ever told a tutor?

Yes I wash my clinic coat

What have you always wanted to do in clinic but didn't have the guts?

Shirtless dental

How long do you expect the restorations you placed this year to last?

Until death do us part

Who from BDS5 would you never let work on your own teeth?

Nithya :-)

What dental instrument/bur are you most like?

Enhanced bur. Thicc, reliable and encouragable!

What are you going to buy with your first paycheck?

A ship

"Sharpest tool in the shed"

Annaajihah Muhamad

Anna

What would your job be if you couldn't be a dentist?

Media Advertising maybe!?

Who is your favourite person in ADH?

Dr Lekkas of course!!!!!!

What have you always wanted to do in clinic but didn't have the guts?

I've always wanted to do aesthetic work... Like full on anterior composite veneers.. But never had the confidence to convince the tutor I could.. refer to SRU it was :(

How long do you expect the restorations you placed this year to last?

Honestly not too severely bad I think! Is 2-3 years long enough? 0.0

What dental instrument/bur are you most like?

Hmmm.. probably an enhanced cup. I like to do the bare minimum but also make things pretty with that bare minimum :P

What are you going to buy with your first paycheck?

I'll save up to buy my first hard-earned Chanel hand bag hehehe

"Anna"

Bernard Lee

Bern(y)

How long do you expect the restorations you placed this year to last?

as in, the one's i've already re-treated? or

Who from BDS5 would you never let work on your own teeth?

Kyle Lye. He's just gonna successfully convince me that I need crowns on all my teeth

What dental instrument/bur are you most like?

why are these questions so hard, this is way too stressful and kinda out of syllabus.. can you just ask me to list the steps for a maxillectomy instead?

What are you going to buy with your first paycheck?

hire a physiotherapist on retainer

"feeling triumphant after a gruelling day of 88011s"

"keep moving forward"

Cecilia Har

hello hello

What would your job be if you couldn't be a dentist?

dermatologist aka pimple/cyst popper

How long do you expect the restorations you placed this year to last?

As long as they can

Who from BDS5 would you never let work on your own teeth?

Never go to a student dentist >.<

What dental instrument/bur are you most like?

Bayonet is god-sent

What are you going to buy with your first paycheck?

Whatever my parents want

Charlotte Goh

Charlotte

What would your job be if you couldn't be a dentist?

A private investigator

What's the biggest lie you've ever told a tutor?

"Yup, I've charted all pocket depths (accurately)!"

What dental instrument/bur are you most like?

The explorer

What are you going to buy with your first paycheck?

Food, plenty of desserts and sweets (after working hard at giving dietary advice 😊)

"How I de-stress after a long week out on placements"

"Me and one of my restorations"

Chayra Wong

Grace's other half

What's the biggest lie you've ever told a tutor?

Yeah, I can get that done in an hour :)

What are you going to buy with your first paycheck?

A Panasonic rice cooker

Chung Shen Yong

CS

What would your job be if you couldn't be a dentist?

mukbang streamer

Who is your favourite person in ADH?

Candice

What's the biggest lie you've ever told a tutor?

Patient FTA 15 minutes into session

Tutor: "go check if your patient is here"

Me: *walks to toilet and back to chair*

Me: "Yeah patient is not here"

What have you always wanted to do in clinic but didn't have the guts?

Play table tennis on the DA's table

How long do you expect the restorations you placed this year to last?

100

Who from BDS5 would you never let work on your own teeth?

kah ming han

What dental instrument/bur are you most like?

The high speed DN bur

What are you going to buy with your first paycheck?

not buy a shitbox

Chia Hao Yang

Hao

"Out for dinner~"

"Discovered my pollen allergy"

Darrshini Parthibhan

Darrshini

What are you going to buy with your first paycheck?

Into my savings ! To be able to feel that contentment every time you think about it :)

"Keep smiling :)"

"Make Dentistry Great Again"

Derek Li Kwok Cheong

ddest

Which ADH staff member would you go on a date with?

Dr Corfield - GOAT of ADH

What's the biggest lie you've ever told a tutor?

yes theres no calculus remaining

ive called them but they didnt pick up - when a pt FTAs

How long do you expect the restorations you placed this year to last?

5-10 years max - definitely not longer than the crowns i have done

What are you going to buy with your first paycheck?

custom keyboard

Declan Candy

The pretty one

What would your job be if you couldn't be a dentist?

Worlds Strongest Man

Which ADH staff member would you go on a date with?

Jon Crowhurst

Who is your favourite person in ADH?

same bloke filing out this questionnaire

What's the biggest lie you've ever told a tutor?

Yeah I luxed for like 5 minutes and the tooth was super mobile, not sure why it de-coronated

What have you always wanted to do in clinic but didn't have the guts?

Idk? Lol

How long do you expect the restorations you placed this year to last?

What do you mean? They're suppose to last forever those restos I did in sim are still going strong how could it be any different?

Who from BDS5 would you never let work on your own teeth?

Probably wouldnt let anyone touch my teeth

What dental instrument/bur are you most like?

Trusty ol' L10, sharp, pretty and guaranteed to cut your gums in the process

What are you going to buy with your first paycheck?

Prolly food or somethin

"zoom lectures (2020-2021)"

Dianna Li

Bing -- my legal name & my nickname... Is that legal?

What would your job be if you couldn't be a dentist?

A doctor. Hehe, I'm just kidding. Probably fulfil my childhood aspirations of being a zoo keeper. You get all the pros of being a vet like playing and looking after animals without having to put them down (I'd like to thank my auntie for tearing down all my hopes and dreams of wanting to become a vet as a 7yo kid)

Which ADH staff member would you go on a date with?

Dr Lekkas! The MVP carrying the entire dental school on her back. Would we even be graduating without her?

What's the biggest lie you've ever told a tutor?

Yes, I definitely removed ALL the calculus and double checked this too, you don't need to look before I send the patient off

What have you always wanted to do in clinic but didn't have the guts?

I had a patient come in for an emergency appointment demanding amalgam to restore his fractured tooth, then proceeded to ask for a pen and paper to draw out how he would like his tooth restored. I was 2 seconds from handing him the handpiece and letting him do it himself.

How long do you expect the restorations you placed this year to last?

No comment. However, if any of you guys treat my patients in the future and see my restorations, I'd just like to say I've grown so much more as a person now, I'm more mature and worldly, and I'm worth more than just one bad filling okay... I'm worth many, MANY bad fillings (Dr Yie, if you're reading this, I'm only referring to before 5th year of course)

"POV, you and me in heaven"

"The Tech Guy"

Doug Lam

Doug

What would your job be if you couldn't be a dentist?

Something in technology

Which ADH staff member would you go on a date with?

Dr. Thomas Corfield

Who is your favourite person in ADH?

Dr. Thomas Corfield

What's the biggest lie you've ever told a tutor?

Yeah I did this denture design before today.

What have you always wanted to do in clinic but didn't have the guts?

Ditch the mask and BREATHEEEEE

How long do you expect the restorations you placed this year to last?

Hopefully at least 5-7 years
